Eyal Katz

Sample work →

I'm a Product Designer focused on making complex products feel simple. With a background as a studio founder and animator, I think beyond visuals - shaping how products feel, move, and come together. I bring clarity under pressure, keep things moving, and add just enough humor to keep everyone sane.

I genuinely enjoy what I do.

PROFESSIONAL EXPERIENCE

Product Design Lead, StreamElements

Tel Aviv | 2022 – now

- Built monetization products from scratch, including creator-brand collaboration tools and community features that power large-scale ecosystems.
- Brought Design System thinking into the daily flow, making consistency the default and significantly shortening the distance between idea and production.
- Used high-fidelity motion and interaction prototypes to show exactly how the product should feel, getting product, engineering, and leadership on the same page before a single line of code was written.
- Transformed design files into a source of truth, creating a structured environment that made cross-functional handoffs feel low-friction and reliable.

Head of Design & Operations / Co-founder, Red interactive

Tel Aviv | 2006 – 2022

- Co-founded and led the studio with a people-first philosophy - "***Grow with a smile***", emphasizing strong process, collaboration, and long-term value over short-term delivery.
- Led UX/UI strategy and execution across hundreds of projects in education, e-commerce, and cybersecurity, working directly with founders, executives, and product teams.
- Translated workshop insights and abstract concepts into rapid, testable prototypes, enabling early validation and informed decision-making.
- Built, mentored, and scaled design teams, establishing standards for clean design, efficient workflows, and clear communication with development teams.
- Balanced high-level design vision with real-world constraints, including tight deadlines, evolving budgets, and shifting business priorities.

askkatzy@gmail.com www.linkedin.com/in/eyalk65 www.askkatzy.com 054-304-0129

Teacher – 3DS Max, Bezalel Academy of Arts and Design
Jerusalem | 2004–2007

Taught 3D fundamentals in the Industrial Design department (BA & MA programs) through hands-on work in 3ds Max, focusing on modeling and animation.

Early Career

1997 – 2006

I spent my early years at digital studios and software companies, growing from a Lead 3D Artist into creative leadership roles. These years gave me a deep foundation in motion and structural thinking, and taught me how to translate complex technical systems into clear, intuitive experiences.

EDUCATION

Graduate Studies in Industrial Design / M.A. program
Bezalel Academy of Arts and Design, Jerusalem | 2006–2008

B.F.A. / Specialized in 3D Art & Animation
New York Institute of Technology, NY | 1994–1996

Design Studies / B.A. program
Foundations in Design and Broad Creative Skills
Fashion Institute of Technology, NY | 1992–1994

SKILLS

Design Operations | Team Mentorship | Design Leadership | Product Strategy
Product Design | UX/UI | Motion & Interaction Design | Rapid Prototyping | Animation
Design Systems | Figma | Cursor
